FRANKEN-CIMT
DENTAL TOOLS

Lauf an der Pegnitz, Hometown of EMUGE-FRANKEN.

WE TAKE INNOVATION TO THE LIMIT.

Even our first threading tools impressed with the power of a new idea. A momentum that continues to inspire us to new levels of performance. Each innovation step leads to increased precision and higher quality – and results in solutions that provide key impulses for new production strategies. This constantly opens up new opportunities for value creation for our industrial partners worldwide.

PRECISION IS IN OUR DNA. FOR MORE THAN 100 YEARS.

EMUGE and FRANKEN have been developing cutting-edge technology in the field of precision tools for over 100 years. Today, the family-run EMUGE-FRANKEN group of companies is one of the world's leading manufacturers of threading, testing, clamping and milling technology products – for customers from the automotive, power plant and aviation industries to mechanical and plant engineering as well as medical technology. We are close to our customers in 60 countries through our own subsidiaries or sales partners.

24/7
at your service.

DENTAL TOOLS FROM FRANKEN. END MILLS AT THEIR BEST.

Highest precision and meticulous handling of the material are the cornerstones of dental technology. This fits in with our core competencies: since 2009, we have therefore made a name for ourselves with medical technology tools for a wide range of materials in dental technology.

The comprehensive range of end mills, grinding burrs, thread milling cutters and twist drills has been optimised for use in demanding dental technology. Today, over 600 different FRANKEN dental tools are available for machining in open and closed CAD/CAM process chains.

MILLING IN A SYSTEM ENVIRONMENT: FOR HIGH-END SYNERGIES.

FRANKEN has developed the new FRANKEN-CIMT product line to utilise the extremely high dynamics of the CIMT Pi5 and Pi5 Turn dental milling machines: The tools were matched to the industrial performance level of the CIMT machines in terms of substrate, cutting edge geometry, finish treatment and coating. The result: Higher precision milling quality in significantly less time. Maximum accuracy of fit for dental workpieces – with minimised reworking thanks to extremely clean surface finishes. The ideal case of a perfectly balanced system for maximum efficiency with the highest quality.

CIMT DENTAL MILLING MACHINES: CUTTING-EDGE TECHNOLOGY MADE IN GERMANY.

Bringing together what belongs together: The dental milling machine manufacturer CIMT Precision GmbH has been part of the EMUGE-FRANKEN group of companies since 2023. A match that is dedicated to precision and innovation. The industrial performance level of the CIMT Pi5 dental milling machine series enables full utilisation of the digital workflow in the dental laboratory.

INTEGRATED SOLUTIONS ALSO IN TERMS OF ADVICE AND SERVICE.

The worldwide customer base is supported by our application engineers. This team of experts provides the following services for the products offered by EMUGE-FRANKEN:

- Worldwide phone consultation and support in solving technical problems
- Cooperation in the development of concepts and proposals to optimise the customer's production process
- Conducting tests with specific customer materials in a specially equipped test department to optimise tool selection and recommendation
- Development and design of customised special tools
- Deployment of service technicians
- Organisation of product-related training courses and seminars worldwide

YOUR MATERIAL. OUR TOOL.

The dental precision tools in the FRANKEN-CIMT product line are optimised for the latest dental materials. The range of applications for end mills, ball-nose end mills, torus end mills and twist drills includes common dental materials such as cobalt-chrome, titanium, PMMA / PEEK, wax and zirconium oxide.
